

Instructions for preparation a paper for Workplace Aerosols

J.L. First¹, P.L. Second² and J.C. Third²

¹Department of Physics, University of Somewhere, Place, Zip Code, City, Country

²Department of Physical Chemistry, National University, Place, Zip Code, City, Country

Keywords: first, second, third, fourth, fifth.

For the international conference on Workplace Aerosols all authors are invited to publish a paper in the conference proceedings.

The paper should be in double column (like this EXAMPLE), and ONE page long. Use A4 page set-up and make all margins (top, bottom, left, right) 25 mm wide. Start typing text here (about 7cm from the top of the page). Use 10 pt Times New Roman font (except for the title which should be in 12 pt bold and in lower case). Centre the title, the authors' names, the addresses, and keywords. For the body of the abstract, start each paragraph with a tab, and use tab settings of 1 cm. Justify the body of the text both left and right.

You can include up to four keywords. Try to use keywords shown on the abstract classification form. For example, if you wish to indicate that your work is related to aerosol-cloud interactions, then use this form of words instead of some permutation such as cloud-aerosol interactions. You can go beyond the categories suggested on the abstract classification form, if you wish to draw attention to a particular technique or application.

Figures (can be in color or in black and white) and Tables may be included in the abstract, but make sure that they have a caption, and that they are numbered consecutively using Arabic numerals. The font used in captions should be 10 pt. Vertical lines in tables should be avoided.

Table 1. Comparison between theoretical predictions and experimental measurements.

Month	Measured density (g/cm ³)	Predicted density (g/cm ³)
January	0.4	121
June	2.4	15280

References should be made in the style (Chapman, 1975), or (Alexander & Nathan, 1986; Finn *et al.*, 1998) or simply refer to Finn *et al.* (1998). Examples of references are shown below. Leave a blank line above the list with references (and also above the acknowledgements).

Authors of posters presented during the conference are invited to submit **up to 4 pages**. Papers which do not fulfil the standards will be rejected.

The paper should be submitted in **both WORD and PDF format** using an email attachment to info@gaef.de.

The deadline for paper submission is **15 August 2010**.

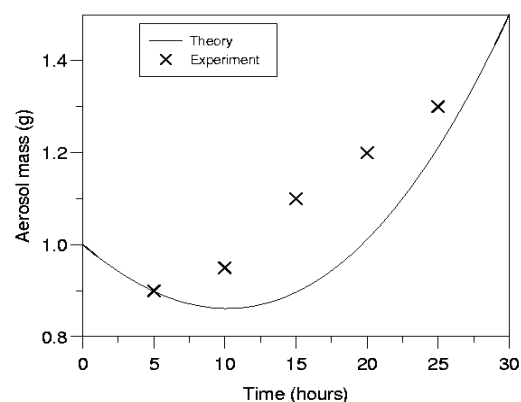

Figure 1. This is the sort of Figure which illustrates good agreement between theory and experiment.

This work was supported by the National Council for Aerosol Research under grant A1/001.
